

FOSTER **PRAGMATIC CYBER RESILIENCE**  
FOR EVERYONE, EVERYWHERE.

A photograph of a dirt road winding through a savanna landscape at sunset. The road is flanked by tall, slender baobab trees with thick trunks and sparse foliage. The sky is a warm, golden-orange color, and the ground is covered in dry grass and small shrubs. The overall mood is serene and majestic.

“ In a fast evolving digital world, businesses need to address cyber risks in order to thrive. Art Resilia aims to be a **trustworthy partner recognised for knowledge and innovation.** Leverage organisations ability to **prepare, respond and recover** from an ever changing cyber threat landscape, upholding us at the center of their success. **Because business resilience is impossible without Cyber Resilience.** “

—Founder Team

# WHY CYBER RESILIENCE?

90's

## COMPUTER SECURITY

Computer centric protection, Mainly based in firewalls and anti-virus locally installed in each computer.

00's

## INFORMATION SECURITY

Information centric protection, adding up by focusing on protecting of the information life-cycle, defining Who, When and Why accesses to it?

10's

## CYBER SECURITY
